

# McMinnville Transportation Bond NW Hill Road Improvement Project

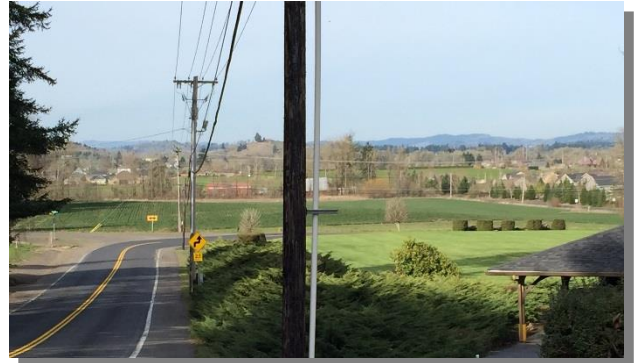

## Background

In November, 2014, McMinnville voters passed a \$24 million General Obligation Bond measure for street improvements throughout the City. The proposed improvements include a mix of several needed street corridor capital projects; pavement overlay and preservation work on the City's "worst condition" streets; and sidewalk and safety improvements. The projects address existing safety and congestion concerns of importance to the City's citizens and businesses along several busy street corridors.

The program consists of seven projects throughout the City:

- Five Capital Improvement Projects to address traffic congestion and improve safety along several street corridors.
- Street Repair and Repaving Projects on portions of 84 City streets.
- Sidewalk and Pedestrian Safety Projects near schools, parks, other public facilities and in the downtown area.

## NW Hill Road

The NW Hill Road Improvement Project is one of the five Capital Improvement Projects identified within the Transportation Bond. This project, located at the western limits of town, is an existing 2-lane rural corridor. Travel lanes and shoulders are narrow and bike lanes and sidewalks are not present. This project will perform widening and other improvements between NW 2<sup>nd</sup> Street and NW Baker Creek

Road, including wider travel lanes, bike lanes, sidewalks, turn lanes, landscaping, & improved roadway geometry. The "S-curves" at Fox Ridge Road will be softened and major intersections at Baker Creek Road, Wallace Road and 2<sup>nd</sup> Street investigated for signal or roundabout control. Field survey and traffic analysis to support concept development are underway. Public meetings will be scheduled in early March and April of 2016.

## Schedule

Preliminary Design: December 2015 – April 2017

Construction: 2017
